ISO 31000
ERM Fundamentals
Training and Certification

This training approach is a combination of giving presentations by material presenters and class dynamics in the form of discussing case studies of the application of risk management in organizations, application-based simulations, and sharing experiences with practitioners. After attending this training, participants are expected to acquire sufficient knowledge and skills to support the implementation of ISO 31000 as an international standard of risk management which has been adopted as SNI ISO 31000 by the National Standardization Agency (BSN) in their organizations.

Learn. Practice. Apply

At the end of this training, participants will be able to:

- Explaining what risk management is and why it is important
- Simulating an integrated risk management process based on SNI ISO 31000:2018
- Integrating risk management into the organization's business processes
- Gaining insights from the experience of implementing risk management from colleagues

ISO 31000
GAME-BASED SIMULATION

EMPIRisk
Exploration&Fun
by CRMS Indonesia

CRMS Indonesia introduced a new learning method called EMPIRisk Simulation. This learning method is based on a fun simulation game in enabling the participants to apply the materials about ERM that they learn during workshop into a real-world scenario.

| Analyse the situation | Make a decision | Learn about the consequences |

A 'game-based simulation' approach will stimulate participants to be able to make risk-based decisions, and also encourage participants to:

- Think creatively in an interactive and fun environment
- Explore and develop during the decision-making process
- Share their experiences with the facilitators who are experts in risk management

A Brief of the iso 31000 training series

CRMS and ERMA organize an intensive and certified training series in order to comprehensively master ISO 31000, which consists of four main tiered types of training:

- **Series 1 : ISO 31000 Fundamentals of ERM**
  Fundamental understanding of integrated risk management principles, frameworks and processes
- **Series 2 : ISO 31000 Risk Assessment Techniques**
  Understanding and proficiency in using various risk assessment techniques
- **Series 3: ISO 31000 ERM Implementation**
  Understanding and proficiency in implementing integrated risk management in the organization
- **Series 4: ISO 31000 Risk Management Maturity Assessment**
  Understanding and proficiency in conducting audits and assessing the maturity of risk management in the organization.

WHO SHOULD PARTICIPATE?

- Director in charge of risk management and compliance
- Commissioners who lead the audit committee and/or risk monitoring committee
- Audit committee member and risk monitoring committee member
- Head of Internal Audit of the organization or Chief Audit Executive of the company organization
- Partners of Public Accounting Firms that provide risk-based audit services
- Consultants engaged in training services and risk assessment services for various corporate organizations
- Risk management practitioners and professionals, especially those who already hold risk management professional certification
- Academics involved in making syllabuses and learning risk management
- Risk Owner in each organizational unit or line
- Risk Champion who is given responsibility by the organization
- Risk Officer who carries out assignments as the main executor of risk management

AGENDA

	Day 1	Day 2	Day 3
Session 1	Introduction to ERM	Framework of Risk Management -Theory	Risk Management Game-Based Simulation
Session 2	Introduction to ISO 31000	Process of Risk Management -Theory Part A	Risk Management Game-Based Simulation
Session 3	Principles of Risk Management -Theory	Process of Risk Management -Theory Part B	Risk Management Case Study
Session 4	Principles of Risk Management - Case Study Application & Exercise	Framework & Process of Risk Management - Case Study Application & Exercise	ERMA RM3: Risk Management Maturity Assessment

*Without disrupting the program as a whole, the above schedules may change from one to another if deemed necessary by the committee and/or course leaders.

RISK MANAGEMENT PROFESSIONAL CERTIFICATION

After participating in the entire training process, participants can take part in a certification program which is a form of recognition of competence in the implementation of risk management in an organization.

This recognition is beneficial both for someone who is involved in the implementation of ISO 31000 in their own organization or institution, or who has a role as a consultant or independent assessor for ISO 31000.

ERMA

 ERMA

Enterprise Risk Management Academy (ERMA) was established as a global learning center in the field of Enterprise Risk Management (ERM) based in Singapore, which provides ERM classes and certifications, and has hundreds of members spread across America, Asia, Australia, Africa and Europe.

ERMAP, given by ERMA to professionals who are relatively inexperienced in the field of Enterprise Risk Management (ERM), but are able to demonstrate knowledge of the basic principles in a comprehensive and integrated manner, as well as the basic concepts needed in managing risk across the company.

ERMCP is for well-experienced professionals in the field of Enterprise Risk Management who can demonstrate their knowledge, experiences, & skills in managing the Enterprise Risk Management process that consists of the following processes: setting the context and identifying, assessing, mitigating, and monitoring risk.

LSP MKS

 LSP MKS

Lembaga Sertifikasi Profesi Mitra Kalyana Sejahtera (LSP MKS) is fully committed to supporting certification in the field of GRC, has obtained a National Professional Certification Agency (BNSP) license with Number: BNSP-LSP-628-ID, and has been accredited by the Committee National Accreditation (KAN) with Number: LSP-015-IDN.

QRMO certification is designed for entry level, fresh graduates, and/or staff in all work units whose function as beginner Risk Officer beginner and has assignment in supporting risk management process application which is executed by its work units. It also includes the beginner risk management unit staff who acts as risk facilitator for the organization.

QRMA is issued by LSP MKS for staff in all work units, supervisory staff, and assistant managers, who function as middle-level Risk Officers/Risk Champions/Risk Taking Units and are tasked with implementing risk management processes carried out by their work units, including are mid-level Risk Management Unit staff who act as Risk Analysts for the organization.

*Candidates for the certification exam must meet certain requirements
**The exam will be carried out using the written method
